

Assignment #2:

.NET Web Application With JSON Data

Create a .NET Web application that displays a homepage as shown (with image) and hyperlink to a new page that displays all the animals from the JSON file in cards as per the screenshots.

The navigation bar, footer and browser tab should also be modified as shown.

Marks will be allocated for the following:

- Animal.cs class
- JSON service
- Header/footer
- Homepage text/image
- Animals page
- Browser tab text
- Use of Bootstrap

All images displayed on this new page should have an alt text attribute that includes the name and scientific name.
